New Features on the Classes (Gradebook) page

Quick View versus Full View

Two views have been provided for assignments. You can switch your view by clicking the appropriate button in the upper right hand corner of the Classes screen:

- **Quick View** - Displays basic assignment information to help you get an at-a-glance view of upcoming assignments and how your student scored on completed assignments.

- **Full View** - Displays additional fields related to averaging assignment scores so you can see more detail about your student's average for the class. This view will show the breakdown of the students' grade percentage in that class.
