

Community Unit School District 303

Facility Operations

May 23, 2016

Dear Parents, Students and Staff,

It has been determined by the Illinois Department of Public Health and the Federal Environmental Protection Agency that asbestos is a potential health hazard, and pre-cautions should be taken to avoid disturbing any asbestos containing materials. In accordance with these findings, St. Charles Community Unit School District #303 maintains and periodically updates an Asbestos Management Plan.

The AHERA law requires that a visual surveillance of asbestos containing areas be completed every six months, and a re-inspection conducted every three years. As required, St. Charles Community Unit School District # 303 buildings will be inspected for asbestos in June 2016. The three year inspection was completed December 2015 and will be conducted again December 2018. Any evidence of disturbance or change in condition will be documented in the Management plan as required.

The Inspection/Management Plan is available for public review at the Transportation and Maintenance Building located at 901 S. Peck Road in St. Charles, Illinois 60175. Should you wish to review the plans, please call to make an appointment at (331) 228-5197.

John Baird
Assistant Superintendent K-12 Operations
St. Charles CUSD 303
