**What is AP?**  
Advanced Placement is a College Board program that enables students to pursue college-level studies – with the opportunity to earn college credit, advanced placement or both – while still in high school. The program offers courses in more than 30 subjects. The [full list of courses](#) and descriptions is available on the AP website. If you've taken a College Board assessment while in grades 9-12, see below for your potential for success in AP courses. If you've taken an assessment while in grades 9-12, but don't see any AP courses listed below, [link the scores](#) to this account or contact Customer Service at (866) 756-7346 for assistance.

**High School Core Course Work**  
Colleges have different high school course requirements, but all expect you to take classes that challenge your skills. Try to take a core course load of 4 years of English and at least 3 years of Math, Science, and Social Studies. As you work towards your high school diploma, you should consider taking courses that align with your future career interest and college major, which may require more than the standard core course load. You may also want to think about taking Advanced Placement courses in your later years of high school.
