# CUSD303 Password Portal

## Staff use:

The password portal is designed to facilitate self-service password changes. The portal may be accessed via the URL using any internet connected device, or a Kiosk App on a district owned Chromebook, either inside or outside of the district.

**Staff Passwords require a minimum of 12 characters.** Current security recommendations suggest using a passphrase rather than a password.

## Accessing the portal via the Kiosk App on a chromebook:

Before logging into the chromebook, <CLICK> on "Apps" in the lower left corner of the screen, select "CUSD303 SelfService Password Portal"

## Accessing the portal via a browser (any device):

https://ssp.d303.org:9251

To sign into the portal, you can use either your Student ID number, A or M ID number or your login used for Google Apps (aka email address).
